

Bruno Miguel Groth

Software Engineer | PHP Laravel Vue JS Software Developer

I am a software engineer proficient in PHP Vue JS and SQL, dedicated to solving problems with efficient, well-structured code.

WORK EXPERIENCE

Rentcars, Brazil — Mid-Level Fullstack Engineer - Current

Feb/2025 - Current

- Designed and developed from scratch the integration with Nubank - Brazil's leading fintech unicorn. Production-ready integration in just **4 months** — a system that processes an annualized transaction volume of **R\$17.8MM** (approximately **USD\$3.3MM/yr**).

Tech stack:

PHP 5.6, PHP +7, VueJS, Codeigniter, Laravel, AWS.

Squad: Finance

Preâmbulo Tech, Brazil — Mid-Level Fullstack Engineer - 1 year

Feb/2024 - Feb/2025

- Implemented features and bug fixes across both frontend and backend
- Frontend: **Vue.js 3** with Quasar
- Backend: **PHP API** with **Eloquent** ORM and **Slim Framework**.
- Supported system architecture maintenance and enhancements, employing **Docker** for containerization, **Linux** server management, **NGINX** and **PHP-FPM**.
- Conducted **Pull Request** reviews to uphold code quality, continuously focusing on performance optimization and overall application quality.

Key Achievements at Preâmbulo Tech:

- Technical Lead for Version 3: Oversaw the entire ecosystem for version 3, managing VMs, containers, databases and environments for development and QA, ensuring seamless operations and deployment.
- Autonomous Client Solutions: Developed and launched a brand new frontend for **Autonegotiation System** using VueJS, empowering clients to independently create legal agreements, issue invoices, and process payments. This innovation enabled clients to resolve debts autonomously, delivering a **100% self-service experience**.

Tuiuti University of Paraná, Brazil — University Professor - 1 year

Feb/2024 - Feb/2025

As a professor at the Tuiuti University of Paraná, I teach technology courses focused on engineering, programming and software architecture for Computer Science and Systems Analysis and Development classes.

SKILLS

PHP - 4 years exp.

Laravel - 4 years exp.

Vue.js 2 / 3

SQL - 6 years exp.

English (B2/C1)

Linux

Object Oriented
Programming (OOP)

Continuous Delivery
(CI/CD)

AWS

Docker

Nuxt

JavaScript - 4 years exp.

TypeScript

Higher Education Teaching

LANGUAGES

Portuguese - Native

English - Advanced (B2/C1)

PASE Hidrometria, Brazil — Mid-Level Fullstack Software Developer – 6 months

Jul 2023 - Jan 2024

- Frontend: **Vue.js 3, Typescript**
- Backend: **PHP 8+ API, PHPUnit, Laravel, Eloquent, PostgreSQL.**
- Devops: **CI/CD Pipelines, NGINX, Linux, Docker, Jenkins.**
- Direct participation in the creation of a new **VueJS 3** project with **TypeScript**, implementing features and Design Patterns in the initial phases of the application;
- Maintaining and implementing new features in a **PHP 8.2 + Laravel REST API**;
- Development of **Unit Tests** using **PHPUnit**;
- Maintaining and implementing new procedures, database views and datatypes in a **PostgreSQL** database.
- Designed and implemented a **CI/CD Pipeline** for Build, Unit Tests, Code Coverage and Deployment **automatized** process in Development and Q.A. environments using **Jenkins** and **Docker**;

Autoconf, Brazil – 2,2 years

Autoconf, Brazil — Fullstack Software Developer

Jun 2021 - Jul 2023

Stacks: **PHP, Laravel, Symfony, Eloquent, MySQL, Git, Mix and Vite, Node, AWS.**

- Websites development with **HTML/CSS, SASS** and **PHP** with **Laravel**; (+100 projects completed)
- Hosting and Deploying websites using **AWS** Resources (**CodeCommit, API Gateway, Route 53, Certificate Manager, S3, CloudFront, CloudFormation, CloudWatch, EC2, Elastic Beanstalk**);
- **Laravel SAAS** support and maintenance, identifying, testing and solving bugs and problems in **Front/Backend** using **PHP, Laravel, Symfony, Eloquent, MySQL, Git, Mix and Vite, Node.**
- **L1, L2 & L3 Helpdesk Support.**
- **MySQL** Database manipulation;
- **AWS Services:** **CodeCommit, API Gateway, Route 53, Certificate Manager, S3 Bucket, CloudFront, CloudFormation, EC2.**

Tirol Dairy, Brazil — Technical Support Analyst – 3,6 years

Jan 2018 - Jun 2021

- **Help Desk Attendance** for headquarter and more than **25 subsidiaries** (**2000 employees**).
- **High efficiency results** as a **Technical Support**, measured by **SLA / ITIL.**
- **Computer Maintenance:** apps instalation, fixing network and **O.S. problems**

- User, group and profile creation and management in Windows Server 2008.
- IT Security: User and Roles Management and administration in SAP and systems, Execution of KPI's and external auditory processes
- Experience with ERP SAP and Solman;
- Experience with Service Desk Key Indicators;
- Transport of change requests in QAS and PRD environments.
- Analysis and creation of EF/ET documentation;
- Execution of CAB/GMUD inter-sector Meetings;

EDUCATION

Tuiuti University of Paraná, Brazil — *Postgraduate Degree, Computer Software Engineering*

Specialist in Software Engineering, Postgraduate - Lato Sensu

Positivo University, Brazil — *Bachelor's Degree*

jan 2021- dez 2022

- Algorithms
- OOP
- C programming language
- PHP Knowledge
- C# / ASP.NET Core API and MVC Pattern (.NET 5.0 & 6.0)
- Angular Frontend Application
- Git & Github & Gitlab
- Software Architecture: SOLID, Design Patterns, CI/CD, Docker (...);
- Agile: SCRUM, Lean, Sprints, Continuous delivery, Clean Code (...).
- Mobile: Java & Kotlin for Android, Consume data from APIs.

SENAI, Brazil — *Computing Apprenticeship, Technology*

jan 2017- dez 2019

- C programming language
- MySQL Databases
- WEB Development - HTML, CSS
- JavaScript
- Java
- Algorithms
- OOP
- PHP

Hey! I'm glad you made it this far.

Contact me via LinkedIn! It will be a pleasure to connect with you.
